

Minivette® POCT

Collection and dispensing of small blood samples for Point-of-Care tests

NEW!

Minivette® POCT

- Easy sample recovery due to optimal capillary features
- Precise dispensing of small whole blood volumes
- Prevents spillage during transfer to test card
- Available in 20 µl, 50 µl, 100 µl and 200 µl volumes
- Preparations: Neutral, Heparin and EDTA

SARSTEDT

Minivette® POCT

- 1** Hold the Minivette® POCT in a horizontal, slightly declined position, under the wings. The air ventilation hole at the end of the piston should not be covered, nor should the piston be pushed down. Collect the blood drops using the capillary tip ensuring there are no air bubbles present.

- 2** Blood collection is complete when the blood has reached the filter at the other end of the capillary tip.

- 3a** Place the capillary tip on the test field and slightly press down the piston to dispense the whole blood sample.

- 3b** Alternatively, dispense the sample into a micro tube.

All patient blood samples must be treated as potentially infectious. Wear gloves!

Ordering Information

Order No.	Description			Colour Code	Packaging
17.2111.020	Minivette® POCT	20 µl	neutral	white	200 pcs./inner box 2,000 pcs./case
17.2111.050	Minivette® POCT	50 µl	neutral	white	
17.2111.100	Minivette® POCT	100 µl	neutral	white
